We are delighted to inform you that **MSME-Technology Development Centre (MSME-TDC) Govt. of India Organization under Ministry of MSME** based at Agra and having its **Extension Centres at Nagaur (Raj.)**.

The main activities of the centre & its Extension centres include organizing various Skill Development training programmes, Entrepreneurship Development Programme and other Technical and Management Programmes for Individuals, Institutions, working Professionals at National Level.

A huge section of India's unorganized workforce is unskilled and semi-skilled. Most of them pick up skills and knowledge in an informal set up by observing people or working under their guidance or through complete self-learning. As a result, even though they manage to get a job and earn a decent wage or salary, they may not be able to improve their skills. This also affects their productivity and quality of output. They need access to training programs and support from their employers to skill and upskill themselves. This is where skill development course can help them get assessed and certified on their current competencies as per NSQF levels. It also shows them a path to bridge their current knowledge and skill levels to reach a competency level or go for higher skills for professional growth.

## **Benefits for the Students: -**

Through this trainings and certification, the candidates will be able to align existing competencies with the National Skills Qualification Framework (NSQF) for better opportunities in higher education. Besides creating an equitable system, It also helps them explore different options in skilling and upskilling to bridge the knowledge and skill gaps.

- Align the competencies of the unregulated sectors of the country with the National Skills Qualification Framework
- Enhance the chances of employment of individuals and provide them with more options for higher education.
- Reduce the inequalities that are present due to the privileges given to some types of skills and knowledge over others.

**Industrial training/ internship Diploma/ B.Tech (Mechanical, Civil, Electrical, Electronics, Computer Science, Information Technology) students along with specialized practical and product-based training, with live projects”.**

## **Program Features of Summer Training:**

The programs envisage for Engineering 4th to 8th Semester, have been developed on the fulfil the practical/ industrial exposure along with latest software techniques. The programs are uniquely designed college students to achieve a specialization in a particular field of engineering. The Key features that make it the best summer training are as follows:

1. Practical based working.
2. Industrial/ Site visit.
3. Reverse Engineering.
4. Live projects.
5. Latest CAD/CAM software learning.
6. Training by experienced Faculties.
7. Summer Internship Certificate.
8. Software Training Certificate.
